press and hold to change the clock setting.

 $\textbf{Snoozebutton} \qquad \text{Press this button to stop the alarm}.$ 

Press this button anytime to turn on the base backlight.

# Care of the weather phone

- \* Do not clean any part of your weather phone with benzene, thinner or other solvent chemicals this may cause permanent damage that is not covered by the guarantee. When necessary, clean it with a damp cloth.
- \* Keep your weather phone away from hot, humid conditions or strong sunlight.
- \* Every effort has been made to ensure the highest standards of reliability for your weather phone. However, if something does go wrong, please do not try to repair it yourself- consult your supplier.
- Do not use your weather phone outdoors in the rain, or handle it with wet handswater can damage electrical equipment.

#### Unpacking your weather phone

When you unpack your weather phone, make sure you keep all the packing materials in a safe place, in case you later need to transport it or return it for servicing. In the box, you will find:

- \* The weather phone cordless handset
- \* Two rechargeable batteries for the handset
- \* The weather phone base unit
- \* A power lead with AC adapter
- \* A telephone line cable
- \* A Remote Thermo-hygro Sensor

#### The sensor display

# A. Two-line LCD

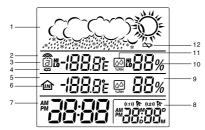

Displays the current temperature and humidity monitored by the remote unit:

- Temperature display
- Humidity display
- Comfort-level indicator

#### B. LED indicator

Flashes when the remote unit transmits a reading.

#### 1.4 Installation

# Choosing a site for the base unit

The base unit should be installed where:

- the mains adapter plug will reach a 240Vac switched mains supply socket -NEVER try to lengthen the mains power cable.
- \* the telephone cable will reach your telephone line socket (you can install an extension socket if necessary).
- $^{\star}$   $\,$  it is not close to another telephone this can cause radio interference.
- $^{\star}$   $\,$  it is not close to a sink, bath or shower, or anywhere else where it might get wet.
- it is not close to other electrical equipment keep it away from fridges, washing machines, microwave ovens, TVs and fluorescent lights, etc.

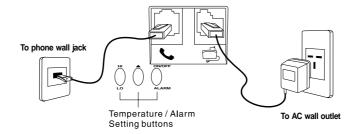

#### Radio signals between handset and base unit

To use your handset and base unit together, you must be able to establish a radio link between them. Be aware that:

- sitting the base unit as high as possible will give better results upstairs often works best.
- \* in a two-storey house, the best position of your base unit may be on the first floor landing.
- any large metal object like a refrigerator, a mirror or a filing cabinet between the handset and base unit may block the radio signal.
- \* other solid structures, like walls, may also reduce the signal strength.

# 1.5 Connecting the base unit

Choose a suitable site for the base unit. Make sure it is not near to another telephone, or other electrical equipment.

#### Installing Handset batteries

The two rechargeable Ni-MH Batteries (AAA size) come with your phone.

1. Fitting the batteries in the handset Insert the two rechargeable batteries as indicated, matching correct polarity (+,-)

Fit the battery compartment cover by

2. Charging the handset batteries

Before using the handset, charge the handset for at least 15 hours

When the battery is low ...

Whenever you see the battery icon on the handset display become nearly empty, a or hear the warning tone during the call, please:

- \* End the call as soon as possible
- \* Don't use the speakerphone mode for conservation since this will further
- \* Put the handset back on the base unit for charging until the battery icon returns to high level.

To charge the handset, put it back in the base cradle. The base [CHARGE] light will come on to indicate the charging of handset. Always put the handset in the base cradle with the keypad facing outwards.

When the battery is fully charged, the handset battery icon will look like this  $\blacksquare \blacksquare$  .

Your handset is now ready for making and receiving calls.

3. Replacing the handset batteries

If you have been using your handset and find that you can no longer recharge the batteries, they may need to be replaced. Always replace both batteries together. The same kind of batteries as supplied in this product should be used. Remove the battery compartment cover by sliding it in the direction shown by the arrow.

#### LCD backup batteries for the base unit

- 1. Fitting the batteries (NON rechargeable) as shown.
- 2. Close the battery compartment cover and secure its screw.

# 1.6 Before you start

# Out of range warning

If your handset is out of range of the base unit, there is a beep sound to alert you, and the display will show:

If so, please move closer to the base unit until the handset display stops flashing.  $% \label{eq:linear_problem}$ 

**Note:** The out of range warning tone is activated in default setting. If you want to disable this tone, please refer to the section "**Tone and Volume**".

Important: Due to radio interference in the environment, occasional loss of synchronisation between the handset and base may occur for a very short duration. The base will very quickly change to another channel automatically to overcome the interference and restore the synchronization. During this short period the handset display will flash.

#### **Electrical safety**

- \* Do not install the base unit near a sink, bath or shower, or anywhere else where it could get wet. Electrical equipment can cause serious injury if used while you are wet or standing in water.
- \* If the base unit ever falls into water, **Do not** retrieve it until you have unplugged the power lead from the mains and the telephone line plug from the telephone socket; then pull it out by the unplugged cables.
- Never use your weather phone in the open air during a thunderstorm unplug the base unit from the telephone line and the main socket when there are storms in your area. Damage caused to your phone by lightning is not covered by the guarantee.

# 1.7 Making and answering calls

#### To make a telephone call

Using phone button

- \* Press to get the dial tone, and dial the number OR
- \* Dial the number then press 📞

Note: If you make a mistake when dialing, press (\$\overline{\pi\_c}\$) to clear digits from the display. A short press will clear one digit at a time or press and hold to clear all digits.

# Speakerphone

- \* Press the speakerphone button to get the dial tone, and dial the number Or
- \* Dial the number then press

In each case, the display shows the call duration after about 15 seconds.

**Note:** If you are in speaker phone mode and you want to use the handset, push button to switch off the speakerphone first.

#### To answer a call

The handset will ring when there is an external call. The icon [EXT] will flash regularly on the handset display.

\* Press • OR

Press \*

When you have answered a call, the display shows the call duration after about 15 seconds.

To end a telephone call

\* Press 📞 .

To redial the last number

\* First press  $\bigcirc$  and then press  $\bigcirc$ 

To make a repeat call from one of the last 10 numbers you dialled

- In the standby mode, press first to see your last call record, then press
   or √a and select a number.
- \* Press 📞 to dial the number

When a number is displayed, you can press  $^{\bigcirc}$  to delete digits one by one and then add new digits by using the keypad. Press  $^{\bigcirc}$  to begin the call.

To use the handset speakerphone during a conversation

- 1. Press (A)
  2. Press (A) to select "Phonebook"
  3. Press (A) to select "Edit Entry"
- 5. Press <a>

  6. Press <a>

  7 or <a>

  A and select the name
- 8. The corresponding name is shown on the display
- 9. Modify the name
- 10. Press 🗽
- 11. The corresponding number is shown on the display
- 12. Modify the number
- 13. Press ( to confirm
- 14. The handset display shows "stored"

# 1.9 Caller display

If you have subscribed to this service from your phone network operator, the caller's phone number will be shown on the handset display when there is an incoming call. The phone can store the caller ID's of up to 10 different call numbers.

**Note:** If the caller's phone number was stored in the phone book, the associated name will be displayed with the phone number.

#### Each entry in the caller list has:

- \* Caller number (up to 20 digits)
- \* The caller name (up to 8 characters) if this is stored in the phonebook or supplied from the telephone network.
- \* The date and time of the last call
- \* The number of calls made to this number (up to 10)

#### **New call indication**

- When a new caller identification is received and displayed during ringing, the caller identification will show.
- "If the call is not answered the handset display shows "New Calls: N" to alert the user of new calls received with the phone icon flashing on the left. The indication will turn off once you have reviewed the caller memory by pressing the 🔏 button.

Note: N indicates the number of new calls not yet viewed.

# How to read the caller identification

- 1. With the handset in standby mode, press  ${}^{\blacktriangledown}_{(\Delta)}$  first to enter the list.
- 2. Press  ${}^{\blacktriangledown}_{L}$  or  ${}^{\blacktriangledown}_{L}$  repeatedly to select the name you want to check.
- 3. Press (ok) to check the phone number.
- 4. Press (ok) again to check the time and date of the call.

Note: There is a warning tone when you reach the end of the list.

You can make a phone call to the number by pressing  $\bigcirc$  at any time during the number display. If no number is received from the caller, then ------ is shown on the bandset

## To clear the call information

- \* Repeat steps 1 to 4 of the above
- \* Press 🕟 again
- \* Press ♣ once
- \* Select the message "Delete?"
- \* Press  $\bigcirc$  to clear the caller information (or press  $\bigcirc$  if you don't want to delete the caller information)

Note: The warning tone will be activated in talking mode in any case.

# Out of range warning tone

When the handset is moving out of the range from the base unit, you will hear the out  $\ensuremath{\mathsf{I}}$ of range warning tone.

To turn this tone off:

- \* Press Ok
- \* Press 🔻 and select "Handset Menu"
- \* Press ok \* Select "Warning Tones"
- \* Press ( and select "Out of Range"
- Press or and select key tone "off" or "on"
- \* Press 🗽 to confirm

Press and hold the button to return to standby mode.

# Handset ring tone

You have a choice of five ring tones for external incoming calls. To select a ring

- \* Press (a)

  \* Press (b)

  \* Press (c)

  \* Pre

- Press or the desired handset ringing tone
- \* Press 🕟 to confirm
- Press and hold  $(\mathbf{P}_{\mathbf{c}})$  to return to standby mode.

Note: If the ring volume is turned off, you will not hear the ring melody while adjusting the ring tone.

# Handset ring volume

You have a choice of five ring volumes, or turning the ringer off. To choose one of these options:

- \* Press Ox
- \* Press 🖔 and select "Handset Menu"
- \* Press 🐧 once and select "Ring Volume"
- Press or to select the desired handset ring volume To turn off the handset ringer, select "Volume Off"
- \* Press  $_{\text{Ok}}$  to confirm

Press and hold  $(\mathbf{u}_{\mathbf{c}})$  to return to standby mode.

#### Handset ring priority

Ring priority allows you to set one handset to ring before others start. To set the handset ring priority:

- Press (A) and select "Setup"
  Press (A) and select "Ring Priority"
- Press (ok)
- Press or to select ring priority "off" or "on"
- Press (ok) to confirm

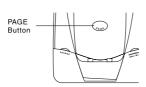

To define the ring priority

- Press Ok
- Press  $\ ^{\bullet}$  or  $\ ^{\bullet}$  key to select which handset you want to define with the ring priority
- \* Press Ok
- Press  $^{\bullet}$  or  $^{\bullet}$  to select the number of rings you want this handset to be ahead of the other handsets
- \* Press  $\bigcirc$  to confirm

# 1.12 Paging the handset from the base unit

This feature is very useful if you can't remember where you put your handset. Make the lost handset ring for a fixed time of 30 seconds by pressing [PAGE] on the base unit.

Note: You cannot have an intercom conversation between the handset and base

# **MULTI-HANDSET USE**

#### 2.1 To register a new handset

Your original handset is already registered to your base unit. You can register up to four more handsets to make and answer calls via the same base unit. Additional handsets are supplied with a charge adapter for recharging their batteries.

You can also register your handset to up to three more base units.

Handsets are numbered 1 to 5 and base units are numbered 1 to 4

#### To register a new handset

- On the base unit, press and hold [PAGE] until the "In Use" LED (green LED) is flashing
- On the new handset.
  - Press Ok 1.
  - Press and select "Registration" 2.
  - Press (ok) the display shows 3.
  - Press  $^{\bullet}$  or  $^{\bullet}$  key to select the base unit number which has no tick (The ticked bases are 4. already in use)
  - Press (button, the display shows "PIN Code?" 5.
  - Enter the PIN code and then press (0s) (Default PIN is "0000". Please refer to section 6 for more information)
  - Display shows "Base Search". Your new handset is searching for the base 7.
  - When the handset finds the base, the BaseID will be displayed  $\,$ 8.
  - Press (ok) to confirm 9.

Note: BaseID is the universal number of DECT. Usually you don't need to use it unless you want to register your handset to the base unit of another brand.

Registration

▶Base 1 v Base 2

▼Base 3

Note: For a weather phone which has not been registered to any base station before, please do the following:

- \* Power up the handset by inserting the batteries
- \* Press the os button, to select "Registration"
- $^{\star}\,$  Repeat from step 3 to 9 of the "To register a new handset" procedures to complete the registration.

# To check the the Base ID on your handset

- 1. Press Ok

- 2. Press A and select "Setup"
  3. Press A and select "BaseID"
- 5. Press (ok)
- 6. The BaseID will show

The new handset is now registered to the base.

#### To de-register a handset

You may need to do this in order to replace a handset.

- 1. Press 🗽

- 2. Press A and select "Setup"
  3. Press A and select "Remove HS"
- 5. Press Ok

- 8. Press 🕟 to confirm

Note: You cannot de-register the handset you are using

#### To select a default base unit

You will only need this function if your handset is registered to more than one base

You can specify through which base unit the handset will make the call or receive the call, or you can simply let the handset connect to the first base station it finds within range (this is the default setting).

- Press (a)
   Press (b)
   and select "Setup"
- 3. Press Ok
- 4. Press (♣ and select "Base"

5. Press Ok

6. Press  $\stackrel{\bullet}{\blacktriangle}$  or  $\stackrel{\bullet}{战}$  to make your selection

Either

- $^{\star}\,$  Select the base number that has the tick against it. This means your handset has been registered to this base before
- \* Select "Automatic" so the handset will automatically link up to the first base unit within range.
- 7. Press ok to confirm

# 2.2 Multi-handset use

Up to 5 handsets can be registered to one base.

#### Intercom between handsets

If you have multiple handsets registered with the base, two handsets can make intercom calls.

# To make an intercom call:

- 1. Press on your handset
- 2. Enter the handset number (1~5) you want to page.
- The paged handset will ring. The display of the paged handset will show your handset number (the paging handset).

Note: Press  $\bigcirc$  or  $\bigcirc$  to cancel an intercom call.

# To answer a intercom call:

- 1. Press 📞 to answer the intercom call
- 2. Press or 📞 to terminate the intercom call

Internal Call Handset 1

# To change the ring tone of an intercom call:

- Press Ok
   Press A and select "Handset Menu"
   Press Ok
   Press

- 7. Press  $\bigcirc$  to confirm
- 8. Press and hold  $\textcircled{\textbf{q}}_{\textbf{c}}$  to go back to standby mode

#### **Call waiting**

If an external call comes in during an intercom conversation, you will hear a "Call waiting" tone.

- 1. To terminate an intercom call, press 🕒 button
- 2. The external line will ring. Press again to answer the external call.

# Calling

#### Call transfer between handsets

You can transfer an external call from one handset to another.

- 1. During an external telephone conversation, press  $_{\mbox{\tiny INT}}$  . Your caller will be put on
- 2. Key in the handset number (1  $\sim$  5) to which you want to the call transferred.
- 3. The paged handset will ring. Both [EXT] and [INT] icons will appear on the handset display.
- 4. To answer the call on the paged handset press  $_{\mbox{\scriptsize MT}}$  .

Note: If the other handset does not answer, press  $\widehat{\mbox{\tiny MT}}$  to terminate the intercom call and get back to the external line. Pressing Sutton will terminate both the intercom call and the external call.

#### 2.3 Conference call

You can have a conference conversation with an external call party and two internal calling parties.

- First establish the call with the external party by either making an external call or answering an incoming call
- Press or to make an intercom call to another handset
- The internal party answers your intercom call by pressing .

- Then you press (#) and hold for about 2 seconds (you will hear a confirmation key tone)
- Then the external party, another internal party and you can talk together

# 2.4 Monitor Mode (Baby sit)

This function is similar to intercom. It allows you to call the second handset automatically by internal call. If it is already set in monitor mode, you can listen to what is happening in another room by using the second handset like a microphone.

To set the second handset to monitor mode:

On the second handset, press (ok)

Select Monitor Mode "On"

Now, when you call the second handset from the first handset, the second handset will automatically answer and you will be in Monitor Mode.

Note: To cancel the Monitor Mode, repeat the above steps and select Monitor

When you hang up the first handset, the second handset in monitor mode will hang up automatically.

# **CUSTOMISING THE HANDSET AND BASE**

#### 3.1 Your handset name

The user name of your handset can be changed. To change this:

- 1. Press Ok
- 2. Press A and select "Handset Menu"
- 3. Press os
  4. Press day and select "Handset Name"
- 5. Press Ok
- 6. Change the name to your new selection (Maximum of 8 characters- pls refer to 1.7 on how to use the keys)
- 7. Press (ok) to confirm
- 8. Press and hold  $\bigcirc$  to return to standby mode

#### 3.2 Handset Auto Answer

When this function is active, you can answer a call directly by removing the handset from the base station. The default setting of your handset is "Auto Answer on". To turn off the Auto Answer function:

- 1. Press Ok
- 2. Press (▼ and select "Handset Menu"
- 3. Press Ok
- 4. Press t and select "Auto Answer"
- 5. Press and select Auto Answer "OFF" or "ON"
- 6. Press 🕟 to confirm
- 7. Press and hold  $(\mathbf{q}_{\mathbf{c}})$  to return to standby mode

Note: If the Auto Answer function is "OFF", you will have to press 📞 in order to answer a call.

# 3.3 Handset display language

The default language for the handset display is English . You can also change the handset display language to French, Spanish, Italian and German.

# To change to other language

- Press ( ) and select "Handset Menu"
- 3. Press (\*)
  4. Press (\*) and select "Language"
- 5. Press Ok
- 6. Press or t and select your preferred language
- 7. Press 🗽 to confirm
- 8. Press and hold  $(\mathbf{e}_{\mathbf{c}})$  to return to standby mode

# 3.4 Handset keypad lock

You may wish to lock the keypad of the handset to prevent accidental information entry

**0--**Ψ

01/01 12:30PM

# To lock the handset keypad

- 1. Press (a)
  2. Press (b) and select "Keylock"
  3. Press (c) to select the "Keylock on"
- 5. Press (ok) to confirm

Important: When the handset keypad is locked, YOU CANNOT MAKE EMERGENCY CALLS

# To unlock the handset keypad

- Press (a)
   Press (b) and select "Keylock"
   Press (a)
- 4. Press  $^{\bullet}$  to select the "Keylock off"
- 5. Press (o) to confirm

# 3.5 Dial out restrictor (Baby call)

With this option, users cannot use the weather phone to make any external calls, except to the pre-programmed baby call number.

 $\textbf{Important:} \ \ \text{When baby call is turned on, pressing any key on the handset will dial}$ the pre-programmed Baby call number automatically. No other calls are allowed, including Emergency calls, unless you program the baby call number as the emergency call number

- 1. Press Ok
- 2. Press (♣ and select "Babycall"
- 3. Press 🗽
- 4. Press (♣ and select "Number"
- 5. Type in your chosen telephone number (including STD code if applicable)
- 6. Press (ok) to confirm

Note: To modify the baby call number, repeat steps 1 to step 5. Pressing the

button to delete by digit.

Make sure you have programmed in your selected Baby call number before enabling this function

# To turn on the baby call:

- 1. Press Ok
- 2. Press and select "Babycall"
- 3. Press Ok
- 4. Press (♣ to select "Babycall on"
- 5. Press ok to confirm

Babycall will be shown on the handset display

# Babycall

# To deactivate Baby call:

- Press Ok
   Press V and select "Babycall"
- 3. Press Ok
- 4. Press ok to select "Babycall off"

#### 3.6 Dial mode

In order to provide compatibility with other telephone systems, your phone can be set to either pulse-dialing (same as rotary dial phones), or tone dialing (DTMF).

#### To set the dial mode

- 1. Press 🗽
- 2. Press (A) and select "Setup"
  3. Press (os)
- 4. Press (♣ and select 'Dialling mode"
- 6. Press or and select "Pulse" mode or "DTMF mode"
- 7. Press (ok) to confirm

# 3.7 PABX features

It is possible to use your telephone with a PABX or a local telephone network. Use of your telephone with a recent system does not require any special adjustment. With centrain older systems, it is necessary to insert a pause between dialing a prefix and dialing the rest of the number. Your telephone inserts this pause automatically during dialing.

# Choice of prefix

In the menu "SETUP" Select "PABX", enter the confidential code for the base followed by the prefix.

# Choice of pause duration

In the menu "SETUP" Select "PABX" then "PAUSE".

### 3.8 Security PIN

# Changing the PIN

- 1. Press (A) and select "Setup"
  3. Press (A) and select "PIN code"
- 5. Press Ok

Note: The PIN is never shown on the display, for security reasons.

Note: Each base unit has its own Personal Identity Number (PIN). The system is issued with the base unit PIN set to 00000000.

#### 3.9 Handset clock

The user can change the handset time and the display format

# To change the handset time format (12 or 24 hour display):

- Press (♣)
   Press (♣) and select "Setup"
- 3. Press Ok
- 4. Select "Clock Setting"
- 5. Press Ok
- 6. Select "Hour format"
- 7. Press Ok
- 8. Select hour format in 12 or 24 hours
- 9. Press **OK** to confirm
- 10.Press and hold  $( \mathbf{m}_{\! \mathbf{c}} )$  to return to Standby mode

# To change the handset date format

- 1. Press Ok
- Press A and select "Setup"
   Press OK
   Select "Clock Setting"

- 5. Press ox
  6. Press (♣ and select "Date format"
- 7. Press  $\bigcirc$  to enter Date setting mode
- 8. Press the or to select the data format in "DDMM" (Date / Month) or "MM/DD" (Month / Date)
- 9. Press  $\bigcirc$  to confirm
- 10.Press and hold  $( \mathbf{m}_{\! \mathbf{c}} )$  to return to standby mode

# To change the handset date and time

- Press Ok
   Press A and select "Setup"
- 3. Press Ok
- 4. Select "Clock Setting"
- 5. Press Ok

- 6. Press  $\bigcirc$  to select "Time Settings"
- 7. Press (ok) to enter Date setting mode
- 8. Press the keypad 0-9 to input the DDMM (Date / Month)
- 9. Press (ok) to confirm and enter Time setting mode
- 10.Press the keypad 0-9 to input the HHMM (Hour / Minute)
- 11.Press (ok) to confirm

# 3.10 Handset alarm

The weather handset has two independent alarms that you can turn on or off and change the settings on.

- Press Os
   Press A and select "Setup"
- 3. Press Ok
- 4. Press and select "Alarms"
- 5. Press Ok
- 6. Press or to select the alarm "1" or alarm "2"
- 8. Press  $\stackrel{\bullet}{\blacktriangle}$  or  $\stackrel{\bullet}{战}$  to select the alarm on/off
- 9. Press  $\bigcirc$  to return to the Setup menu if alarm off selected,
- 10.Press (ox) to enter Time setting mode if alarm on selected,
- 11. Press the keypad 0-9 to input the HHMM (hour and minute)
- 12.Press  $(\mathbf{o}_{\mathbf{k}})$  to confirm and return to the Setup menu

Note: The hour setting is in 24 hours mode

When one of the alarms activates, the handsets will ring with the page tone. Press any key on the handset or [ PAGE ] key on the base unit to stop the alarm.

#### 3.11 Base Unit Time and Date

Normally, the clock will be automatically updated each time it receives an incoming caller ID. However, the user can set the clock manually with the following procedure.

#### Clock setting mode

- \* Press and hold [ **SET** ] for 2 seconds to enter the Set Clock Mode.
- \* Press [ ▲ ] or [ ▼ ] to select the 12 or 24 hour clock display format.
- \* Press [ **SET** ] to save setting and toggle to the Minute setting.
- \* Press [▲] or [▼] to increment or decrement the minute counter. Pressing and holding the [▲] or [▼] button for 2 seconds will enter the fast clock adjusting mode.
- \* Press [ SET ] to save and toggle the M/D setting.
- \* Press [ ▲ ] or [ ▼ ] to select the MMDD or DDMM format.
- $^{\star}$   $\,$  Press [ SET ] to save and toggle the Month setting.
- \* Press [ ▲ ] or [ ▼ ] to set the Month.

Whether Month or Date appears first in the display will depend on the MMDD or DDMM setting made in section 6.

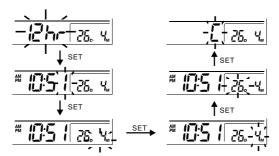

- $^{\star}$   $\,$  Press [ SET ] to save and toggle the Date setting.
- \* Press [  $\blacktriangle$  ] or [  $\blacktriangledown$  ] to set the Date.
- \* Press [ **SET** ] to save and toggle the temperature display (°C and °F setting).
- \* Press [  $\blacktriangle$  ] or [  $\blacktriangledown$  ] to set the temperature display (°C and °F setting).
- \* Press [ SET ] to exit clock setting.

**Note:** Press [ **Channel** ] or [ **Alarm** ] or no key press within one minute to return to standby mode.

Once the minute value is changed, the second will be reset to 0. The base unit will automatically update the handset time.

# 3.12 Base Unit Alarm

The weather phone has two independent alarms.

# Alarm management on the base unit

In Calendar display mode, pressing [ **Alarm** ] key will display Alarm 1. Pressing [ **Alarm** ] key again will display Alarm 2. Pressing [ **Alarm** ] again will go back to the Calendar display mode.

# Alarm setting mode

- Press [ ▲ ] or [ ▼ ] to increment or decrement the minute counter, pressing and holding the [ ▲ ] or [ ▼ ] buttons for 2 seconds will enter the speed adjustment mode.
- $^{\star}$   $\,$  Press the [ SET ] button to toggle between the alarm being enabled or disabled.

# **WEATHER FEATURES**

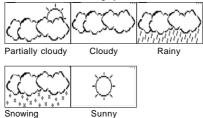

The weather base unit displays the weather forecast as well as the outdoor and indoor temperature and relative humidity. You may also set the alarm to activate, indicating when a certain temperature or humidity has been reached.

# 4.1 Weather forecasting on the handset

To display the weather forecasting symbols on the handset:

- 1. Press 🐠
- 2. Press ok to select "Weather"
- 3. Press 🕟 to select "Forecast"
- 4. Press (ok) to confirm
- Standby mode.

Five weather forecasting symbols:

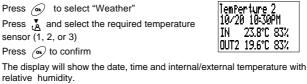

### 4.2 Temperature on the handset

The handset can display the temperature information for both the built-in and external sensors. To view the temperature readings on the handset dispay.

- 1. Press Ok

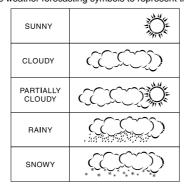

- Press to select "Weather"
   Press and select the required temperature sensor (1, 2, or 3)
- 4. Press 🕟 to confirm

Note: The "Out 2" on the bottom represents the temperature and humidity reading from the outdoor sensor, channel 2.

# 4.3 Weather forecasting on the base unit

The weather forecast display is the first line of the LCD display on the base unit. There are five weather forecasting symbols to represent the weather:

# 4.4 Outdoor temperature sensors on the base unit

- •→♠→•→♠ means the channel searching function is in progress
   means that no sensor has been found, and so no temperature is being received.
- To initiate a remote unit search:
- Pressing and holding the [ CHANNEL ] for 2 seconds will start a 3 minute remote unit search.

# Switching between the outdoor sensors

\* Press the [CHANNEL] button repeatedly to switch the sensor display between sensor channels 1, 2 and 3.

#### 4.5 Indoor temperature sensor in the base unit

The indoor temperature shows on the third line of the LCD display.  $\widehat{\text{LM}}$  icon on the left, represents the temperature on the built-in sensor, and also shows the local humidity reading on the right of the  $\widehat{\text{LM}}$  icon .

#### 4.6 Remote temperature and humidity alarm setting

The remote temperature and humidity alarms are only linked to the remote sensor on Channel 1. There is no alarm option available on Channel 2, 3 or built-in sensors.

#### Temperature and humidity alarm setting

- Press [ HI/LO ] at the back of main unit (please refer to section 1.5 Installation

   Connecting the base unit) to enter the remote temperature and humidity alarm setting mode.
- The sequence of pressing [ HI/LO ] key for alarm setting is: High Temperature Alarm, High Humidity Alarm, Low Temperature Alarm and Low Humidity Alarm as follows

- Press [▲] at the back of the main unit to increment the setting values by 1°C or 1.8°F and 1 % of humidity, or press and hold [▲] at the back of the unit for speed setting values by 5°C and 5% of the humidity.
- 4. The alarm will be enabled after setting the values of each item.
- 5. Pressing [ **ON/OFF ALARM** ] key at the back of the main unit to toggle between enable/disable for each item.
- 6. During the temperature and humidity alarm, sound is emitted. Press the [ CHANNEL ] to stop the alarm .

# To remove the temperature and humidity alarm setting

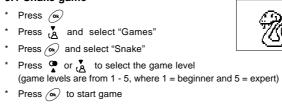

- 1. Press [ HI/LO ] to select the value you want to remove
- 2. Press [ ON/OFF ALARM ] to remove the information
- 3. Press [ CHANNEL ] to confirm and return to standby mode

The remote temperature and humidity alarm will be emitted when the values of the remote sensor in channel 1 received are out of range. The value will flash with "HI" or "LO" to indicate which alarm setting has been reached and beeping tone will last for 1 minute.

# **GAMES**

The weather phone handset contains two games

# 5.1 Snake game

#### **Game Control**

Using the keypad, press as follows to direct the snake

<u>Key</u>	<b>Direction</b>
2	<b>†</b>
6	$\rightarrow$
8	<b>↓</b>
4	_

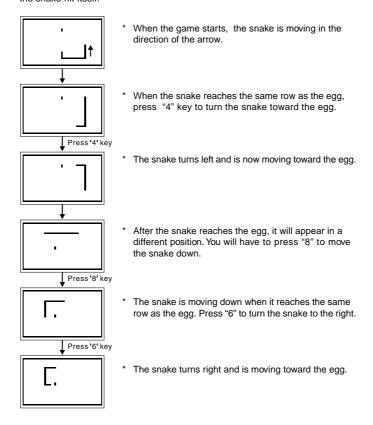

Note: When the snake is moving , you only need to turn the snake to the left or right. There is no need to move the snake forward. If you move the snake backwards, it will hit itself and the game will be over.

LEVEL 1

#### How to play

When the game starts, you will see a snake moving along the screen. To win the game, you will have to direct the snake to the eggs without hitting the wall or letting the snake hit itself.

# 5.2 Car game

- \* Press (A and select "Games"

  \* Press (A and select "Car"

  \* Press (A to enter Car game

LEVEL 2

# **Game Control**

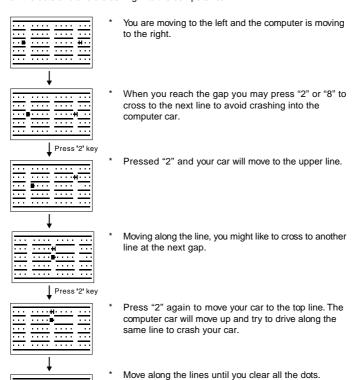

Using the keypad, press as follows to direct your car:

<u>Key</u>	<u>Direction</u>
2	<b>†</b>
6	→ (break
8	<b>↓</b>

Note: When your car is moving along, you will only have to move the car to the next row in between the gaps by pressing key 2 and 8, ↑ and ↓. The backward key → reduces the car's speed.

#### How to play

When the game starts, you are the one driving the car from right to left, and you will see there is a computer car driving from left to right. The computer car will try to crash into your car. In order to win the game you will have to drive your car, clear all the dots and avoid crashing into the computer car.

# **RESETTING YOUR SYSTEM**

Important: If you need to reset your system you will lose any information that you have stored and all settings will return to their default settings

There are two levels of reset procedures:

# 6.1 Resetting the DECT phone

# Level 1: With your PIN code

- \* Press 🔊

  \* Press 🐧 and select "Setup"

  \* Press 🐼
  and select "Default"

- \* Press Ok
- \* Enter PIN code and press 👁
- \* Confirmation melody will come from handset

Then both handset and base will start the reset sequences.

# Default Settings:

language	English	INT melody	1	PIN CODE	0000
handset name	HANDSET	ring volume	3	dial mode	DTMF
low batt indicator	ON	ear volume	2	ring priority	none
out of range indicator	ON	phonebook	empty	PABX codes	none
keyclick	ON	CLID list	empty		
auto answer	ON	Redial list	empty		

#### Level 2: If you forget your PIN code, you will need to reset the PIN code to the default value of "0000"

- \* Remove the handset batteries
- \* Press and hold 🐛
- \* Insert the batteries into the handset again then release 🐛
- \* Handset display shows "Default"
- \* Press any key to return to Standby mode

# 6.2 Resetting the weather station

\* Place a blunt stylus into the hole marked RESET on the back of the base unit .

# 6.3 Resetting the sensor

- Lift open the battery compartment door
- \* Place a blunt stylus into the hole marked [RESET] and press.
- \* Replace the battery compartment door

# **PROBLEMS**

If your weather phone is not working correctly, check the points here before returning it for repair.

Whatever your problem, you should first check that:

- You have installed the base unit correctly, and it is plugged into the telephone line and the mains power socket.
- \* Mains power is switched on at the socket
- \* You have installed the batteries into the handset

If the problem persists please contact our help line on 01628 580154.

NEVER attempt any repairs or adjustments yourself - you could make the problem worse and invalidate your guarantee.

#### **Troubleshooting**

Problems with making and answering calls

#### "I cannot make or answer calls."

- \* Try moving the handset closer to the base unit
- \* It this doesn't work try a different position for the base unit perhaps higher up if possible.
- \* The battery charge level may be low place the handset in the charging cradle of base unit to recharge the battery.
- \* Switch off the power at the main socket, wait a few seconds and then switch the power back on, this may solve the problem.

# "When I press the phone button 📞 , I hear the busy tone."

\* Please check if the line is already in use by other handsets registered to the same base unit. The EXT symbol on your handset would indicate this.

# "When I press keys on my handset, nothing happens. The display is showing the $\frac{n}{2}\pi$ symbol ."

You may have accidentally locked your keypad. Please unlock your keypad. (refer to section entitled "Handset keypad lock")

#### 

- You may have enabled the Call barring function on this handset, so you will hear the busy tone in the earpiece but nothing is dialing out.
- \* Try moving the handset closer to the base unit.
- \* If this doesn't work, try a different position for the base unit. Make sure it is not near any electrical equipment, such as another phone, a TV, a radio, a washing machine, a fridge, etc. If possible, position the base unit higher up.
- \* If any other handsets are registered to the same base unit, make sure they are not already on a call --- you would see the EXT symbol on your own handset.

You may need to change the dial type setting to Pulse dialing if your local telephone exchange does not support Tone dialing.

# "My call was cut off when I went out of range of the base unit. Now I cannot use my handset."

\* Please move the handset closer to the base unit.

# "I hear a tone while I am using my handset, and the battery symbol on the display is "empty"."

\* The battery needs to be recharged. Put the handset into the charging cradle of the base unit; it will take up to 15 hours to be fully charged.

# "I've tried recharging the batteries, but I still get a warning that it is not charged."

\* The batteries probably need to be replaced.

# "The handset does not ring when a call comes in."

- \* Check that the total REN value of all equipment connected to your telephone line is on more than 4. Disconnect one or more telephones and see whether that helps.
- Check that you have not set the ringing volumes to "off" (see section Tones and Volumes).

# "The Caller Display function is not working"

\* Please check if you have subscribed to the Caller Display service with your network provider.

# "The Caller Display function is working but the Caller's Name from the phonebook is not displayed even if the same telephone number calls in"

\* You need to store the full telephone number including the STD code into your phonebook memory.

#### 

- \* Unplug the power adapter at the bottom of the base unit. Then reconnect the power adapter. Press and hold [PAGE] on the base until [IN USE] (green LED) is flashing.
- \* Repeat steps 1 9 at 2.1 Registering new handset

# 

Due to radio interference in the environment, occasional loss of synchronisation between the handset and base may have occurred for a very short period. The base will quickly change to another channel automatically to overcome the interference and restore the synchronization. You can also move the handset near the base station to reduce the interference. If you don't want to hear the beep tone, you can change the handset menu settings to turn off the OUT OF RANGE tone.

#### Multi-handset use

# "I'm having problems registering a new handset."

- \* Unplug and plug in again the mains power cord of the base unit to activate the registration procedure.
- \* Make sure you have selected a base number that is not already assigned, and ensure you choose from the base numbers that are not flashing.
- \* The base unit may have already registered all 5 handsets. You need to deregister (delete) one of them before registering a new handset.
- \* If you are replacing a faulty handset, make sure you have de-registered the faulty one before registering the new one.

#### "I cannot make a call."

- Only one outside call and one intercom call can take place at once. Make sure no other handset user is already on a call.
- \* Please check if another handset has engaged the line already. If this is the case you will see "EXT" on your handset. When you press , you will hear the engaged tone.

#### Advanced telephone features

Problems with programming

- "I changed the PIN, and I've forgotten the new one."
- \* Please refer to section 6 Resetting your system.

#### Weather station features

- "I cannot register my sensor with the base unit."
- \* Select channel by pressing [CHANNEL] on the base unit.
- Reset the sensor and place it close to the base unit. Wait 10-15 minutes to ensure the sensor has enough time to connect to the base unit.

#### OR

- Press & hold the [CHANNEL] button for 2-3 seconds, to enable the base unit to search for the sensor.
- "I cannot set the clock and date."
- Press and hold the [ALARM] button until you see "TIME" on the display of the base unit flashing, then press [▲] or [▼] to amend.

# **TECHNICAL DETAILS**

Digital Enhanced Cordless Telecommunications

Frequency range 1.88 to 1.9 GHz (band width = 20 MHz)

Channel band width 1.728 MHz Modulation **GFSK** 

Speech coding Adaptive Differential Pulse Code Modulation

(ASPCM) At 32 kbit/s

Communication range
