

Extra Handset WD338HSC Quick Installation Guide

Installation

a) Connecting the charger

b) Installing handset batteries

- 1) Insert the batteries to the handset following the correct polarity.
- 2) The handset must be charged for at least 15 hours before initial operation.
- 3) To use and register the extra Handset WD338HSC to your WD338 main base, refer section 2.1 of your WD338 User's manual.

Note: Reversing the battery polarity may damage the unit.

Safety

- 1) Use the supplied adapter only & do not try to lengthen the power cable.
- 2) Do not place this Handset phone close to another phone or other electrical equipment that may cause interference and result in the abnormal function of this phone.
- 3) Occasional loss of synchronization between handset and base unit is normal if there is a high level of electrical interference in the environment.
- 4) Do not install the charger near a sink, bath, shower, or anywhere else where it can get wet.
- 5) If the charger fell into water, do not retrieve it until you have unplugged the power lead from the mains socket.
